C. G. Jung's Archetype Concept

Theory, Research and Applications

Christian Roesler

The concept of archetypes is at the core of C. G. Jung's analytical psychology. In this interesting and accessible volume, Roesler summarises the classical theory of archetypes and the archetypal stages of the individuation process as it was developed by Jung and his students. Offering new insights on foundational Jungian topics like the collective unconscious, persona, and shadow, C. G. Jung's Archetype Concept is of great interest to Jungian students, analysts, psychotherapists, and scholars.
