

JUNGIAN CHILD ANALYSIS

Lectures | Audrey Punnett, PhD

Session 1. April 09, 2022, 09:00~11:00 AM (Taipei, UTC + 8:00)

The Orphan: Being at One with Oneself and the World

This lecture will focus on the experience of being alone and being at one with oneself in the world. The journey toward wholeness is accomplished by paying attention to the archetypal images that come to us through dreams, active imagination and making time for imagining. Dr. Punnett will use excerpts from her book, *The Orphan: A Journey to Wholeness*, to illustrate the connection between psyche and spirit through the archetypal image of the orphan.

Session 2 April 16, 2022, 09:00~11:00 AM (Taipei, UTC + 8:00)

Conceptualizing Jungian Theory:

Finding Nemo: A Modern Tale for Understanding the Orphan Archetype

This presentation will expand on the orphan topic by using excerpts from the film of the fish tale, *Finding Nemo*, with group discussion about the individuation journey as initiated by the death of Nemo's mother, Coral. One will gain a deeper understanding of Jungian theory and specifically how the early trauma and orphan archetype became manifest, and what this calls one to do.

Session 3 April 23, 2022, 09:00~11:00 AM (Taipei, UTC + 8:00)

Jungian Play Therapy

Play is an important part of child therapy and according to Winnicott, it is “only in playing that the individual child or adult is able to be creative and to use the whole personality, and it is only in being creative that the individual discovers the self.” (Winnicott, *Play and Reality*, p. 54) The lecture will look at some major differences in the kinds of play with children, the differences between ordinary and therapeutic play and between child analysis and child therapy, and then focus on Jungian child therapy.

Session 4 May 7, 2022, 09:00~11:00 AM (Taipei, UTC + 8:00)

Children's Dreams

Jung states in Nietzsche's Zarathustra, "...our dreams are like windows that allow us to look in, or to listen in to that psychological process which is continually going on in our unconscious" (Jung, 1934, p. 236). For the child the dream is a very real world. For this reason, we cannot work with their dreams as we would with adult

dreams. This lecture will discuss the ways in which we can look at children's dreams from a Jungian perspective.

Session 5 May 14, 2022, 09:00~11:00 AM (Taipei, UTC + 8:00)

Working with Children's Dreams

A series of dreams will be given to explore the process of working with children's dreams. We will work in small break out groups and utilize strategies learned from the previous session. Illustrations of first sand trays will amplify the theme from dreams. Time permitting; we may be able to work with the dreams of children patients of those participating in the session.

****The lecturer and the organizer keep the organizer who changes the course setting.***

About Audrey Punnett Ph.D

Audrey Punnett, PhD, is a licensed psychologist who holds diplomas in Adult Analytical Psychology and Child and Adolescent Analytical Psychology from the C.G. Jung Institute, Zurich where she lived for over 5 years. She is a member of the C.G. Jung Institute of San Francisco (CGJI-SF) and the Association of Graduates in Analytical Psychology (AGAP).
